4. Safety record

Item	What the record shows	Source
OSHA inspections Not checked here	OSHA lookup isn't turned on for this check. Most small residential contractors have no OSHA records.	US Department of Labor, OSHA inspection data Checked October 15, 2026

5. Items to verify before you sign

1. Read the complaint and disciplinary history on the CSLB license page. ([CSLB license page](#))
2. For a corporation or LLC, check that the business is active with the Secretary of State. ([California Secretary of State](#))
3. Ask for a certificate of liability insurance and call the insurer to confirm it is current.
4. Make sure the license number on your contract matches the one checked here.

6. What a records check can't tell you

A records check confirms what's on file. It can't call past clients, meet the owner, look at finished work, or tell you how a contractor handles a problem halfway through a job. That part takes people. Every contractor in the GreatBuildz network has passed all of it: license and insurance verification, 5+ years in business, past-client calls, an owner interview and a background check.

[See if GreatBuildz works in your area](#)

This report shows public records and Google Maps data as they appeared on the dates listed. Records can change at any time. It is not legal advice and not a recommendation for or against any contractor.
